

## LIFE CYCLE WORKSHEET

- What life cycle are you focusing on (e.g., the life cycle of a butterfly)?
- What are the different stages in this life cycle? Can you describe each stage in detail?
- Can you identify any challenges or risks that the organism might face at each stage of its life cycle? How does it adapt to overcome those challenges?
- How do the different stages in the life cycle contribute to the balance and functioning of the ecosystem?
- How does the life cycle of this organism connect to other living things in its environment? Can you describe any relationships the organism might have formed in which one or both organisms benefit from the relationship? How does the life cycle of this organism contribute to the balance of nature?
- What imperfections did you notice in the life cycle, and how did they enhance its beauty?
- What did you find most interesting about the life cycle of this organism?
